### MEETING AGENDA

**When:** July 9th , 2013 • 7 PM • Township Administration Building

#### I. Minutes Approval: July 11<sup>th</sup> , 2013

#### II. Plans: Blueberry Hill Site Modification

- a. From Jan 2007- As stated previously, EAC strongly suggests that if the tree waiver is granted and a fee is accepted in lieu of tree plantings, that the township set a fee that is comparable to an equivalent amount of trees that would have been recommended for this site. EAC would like to see the revised tree management plan and the arborist report.
- b. From August 2006- EAC would like to see a filtration system incorporated into the storm water plans so runoff is free of oil and grit before it is discharged into the stream. EAC disagrees with the statement that there is enough vegetation and mulched areas to provide water quality improvement opportunities considering the slope and the amount of impervious surfaces. EAC strongly suggests that if the tree waiver is granted and a fee is accepted in lieu of tree plantings, that the township set a fee that is comparable to an equivalent amount of trees that would have been recommended for this site. All storm drains must be stenciled with the township's standard "Rain Only" stencil. Contact Kate McGovern, Township Special Projects Coordinator, to order the stencil.
- c. From November 2006- Given the amount of open space in the back of the site and considering the amount of tree disturbance, EAC recommends increasing the amount of trees planted in this area.
