

STANDBY/BACKUP GENERATORS

- An Electrical Permit Application is required.
- Two copies of 3rd party reviewed and approved electrical plans are required
- If the generator is fueled by natural gas or propane include a Mechanical Permit Application with a piping diagram indicating materials used and if the piping is buried.
- If fueled by natural gas, submit a copy of the PECO response to the "Increase in Natural Gas Usage" application.
- Provide two copies of installation instructions that show how far the generator is to be located from combustible construction, windows that open, combustion air intakes, etc.
- Include two copies of a site plan that show the location of the generator and its distance from the building, opening windows and property lines.
- A site plan can be hand drawn or a "Google Earth" or other print of the property.
- The generator should be no closer than 7 feet to property lines.
