PAGE **6** 30th Anniversary of Central Park

Chairman's Message

By: Jennifer Herring, Chairman, Doylestown Township Board of Supervisors

As we approach the 30th anniversary of Central Park, we are excited to announce that the latest round of renovations is nearing completion. These new enhancements will include pickleball, tennis, and basketball courts, a bocce ball area, and a newly constructed comfort cottage featuring updated bathrooms for all to enjoy. Central Park will also be home to our new Community Recreation Center, where people can come together to learn and play. These additions have been carefully designed to serve the growing needs of our community, ensuring that Central Park remains a place for all ages, abilities, and interests to come together. The completion of these improvements will coincide with our 30th-anniversary celebrations, making this a truly spectacular year for the park.

None of this would have been possible without the generous support of many individuals and organizations. We would like to extend our deepest gratitude to the Capital Campaign Committee, whose remarkable efforts have raised over \$3,000,000 to fund these projects. Their dedication, passion, and tireless work have brought this vision to life. This significant achievement reflects the power of community collaboration, with volunteers, donors, and local businesses contributing to the future of Central Park. The funds raised include grants, pledges, township event proceeds, and cash contributions, all coming together to make these enhancements a reality.

This latest phase of development would not have been possible without the hard work and commitment of the Doylestown Township staff, volunteers, and board members, whose continued dedication to the park is evident in every new addition and improvement. It is also important to recognize the essential role that our residents and the local business community have played in making these projects a reality. We are truly fortunate to live in a community that values its green spaces and recognizes the importance of maintaining and growing them for future generations.

Explore Doylestown Township's Expanding Bike & Hike Trail System This Spring!

As the warmer weather returns, there's no better time to explore the incredible network of trails that wind through Doylestown Township. With over 30 miles of completed trails, our community is dedicated to expanding these connections to seamlessly weave together our beautiful parks, neighborhoods, and key destinations.

One of the latest additions to the trail system is the newly completed Shady Retreat Road Trail, a vital project that enhances pedestrian and bicycle access for residents and students. This shared-use path stretches approximately 1.1 miles along Burpee Road, North Shady Retreat Road, and Limekiln Road.

The Shady Retreat Road Trail is an essential part of the Safe Routes to School initiative, designed to provide safer and more accessible pathways for students traveling to and from schools such as Delaware Valley University, Doyle Elementary School, and Lenape Middle School. Additionally, this new trail connects to existing pathways leading to Central Park and the Route 202 Trail, offering expanded recreational and commuting options for all trail users.

In addition to improving connectivity, the project also enhances safety by addressing pedestrian and bicycle concerns at the intersection of North Shady Retreat Road and Burpee Road. A new three-way stop condition has been implemented at this crossing, ensuring safer passage for cyclists and pedestrians.

The ribbon-cutting ceremony for the Shady Retreat Road Trail took place on November 15th, marking an exciting milestone for the community. Doylestown Township extends heartfelt thanks to Senator Steve Santarsiero, State Representative Tim Brennan, the Board of Supervisors, the Bike & Hike Committee, the Delaware Valley Regional Planning Commission (DVRPC), and PennDOT for their dedication and efforts in securing grants and resources, including funding from the Transportation Alternatives Set-Aside (TASA) grant program. Their unwavering support has helped bring this project to fruition, creating safer, more accessible roadways and trail connections that benefit everyone.

The Bike & Hike Committee also partnered with the Welding and Collision Repair Technology Class at MBIT to expand the presence of iconic bridge silhouettes on the Bike & Hike trails, including a new installation on the overpass on Limekiln Road. This addition enhances the trail system's visual appeal while continuing the effort to place these unique silhouettes on bridges and overpasses throughout the community, celebrating Doylestown's collaborative spirit and history.

This spring, we encourage you to get outside and take advantage of the growing network of trails right in our backyard. Whether you're biking, jogging, or enjoying a leisurely walk, the Doylestown Township trail system offers an incredible way to experience the beauty of our parks and neighborhoods while staying active and connected.

Grab your bike or walking shoes and start exploring today!

Chairman's Message

Continued from Page 1

As we celebrate 30 years of Central Park, we reflect on how far the park has come and the future we are building together. The park remains a vibrant hub for recreation, education, and connection—where every corner offers something new to explore. From the renovated Kids Castle to the new sports courts and gardens to the new Community Recreation Center, every addition serves to enrich the lives of our residents and visitors, enhancing the sense of community that makes our township so special.

We look forward to continuing to serve our residents with future events and initiatives at the park and are excited about what the next 30 years will bring. Thank you to everyone who has contributed to this incredible journey. Your support has helped ensure that Central Park remains a beautiful, accessible, thriving space for all to enjoy.

Introducing the Doylestown Township Human Relations Commission

Doylestown Township is proud to introduce the Human Relations Commission (HRC), a newly established Commission dedicated to fostering inclusivity and addressing discrimination within our community. Created under Ordinance No. 426, the HRC serves as a local resource for individuals who feel they have experienced discrimination and seek mediation to resolve disputes.

STRUCTURE AND MEMBERSHIP

The Human Relations Commission will consist of four appointed members, each serving overlapping four-year terms. A minimum of three members must either reside in the Township, work full-time within the Township, or own a business operating in the Township. The Board of Supervisors will appoint these members, ensuring a broad representation of the community's interests and concerns.

To further enhance its effectiveness and diversity of perspectives, the HRC may elect three non-voting, ex officio members. Additionally, a designated member of the Board of Supervisors will serve as a liaison, facilitating communication between the Commission and the Township leadership.

HOW THE HRC CAN ASSIST YOU

If you live, work, or have visited Doylestown Township and believe you have faced discrimination based on one of the protected classes outlined in Ordinance No. 426, the HRC is here to help. The Commission can assist in addressing concerns and guide you through the process of seeking a fair resolution, ensuring equal access to housing, employment, and public accommodations. For more information about the HRC visit our website.

Keep Your Dog on a Leash: It's the Law & It's Courteous

Doylestown Township is home to beautiful parks and trails that welcome residents and their four-legged friends. However, to ensure the safety and enjoyment of all visitors, **dogs must be kept on a physical leash and under control at all times** while in township parks and trails, as stated in **Ordinance No. 386**.

Keeping your dog on a leash isn't just a township rule—it's also **Pennsylvania state law**. The Pennsylvania Dog Leash Law requires that all dogs must be confined within the owner's property or under the control of a person when off their property. A leash ensures that your pet stays safe, prevents conflicts with other parkgoers, and helps protect local wildlife.

HELP KEEP OUR PARKS CLEAN

In addition to keeping your dog leashed, please remember to **clean up after your pet**. Township Ordinance No. 386 prohibits littering of any kind, including pet waste. **Always dispose of waste in designated trash receptacles** to help keep our parks clean and enjoyable for all.

By following these simple rules, we can all enjoy the township's parks safely and responsibly. Thank you for being a considerate pet owner and community member! For more information on **Pennsylvania's dog laws**, visit www.pa.gov.

Customers of the Doylestown Township Municipal Authority

Drought Emergency Declaration Mandatory Water Conservation

Drought Update - March 26, 2025

The Doylestown Township Municipal Authority (DTMA) would like to update our customers on the mandatory water conservation measures required by the Authority. Due to the unprecedented duration of drought conditions, DTMA groundwater levels continue to decline. The latest PA Department of Environmental Protection (DEP) drought indicator status benchmarks and the conditions set forth in DTMA Drought Contingency Plan require the Drought Emergency to remain in place.

The measures enacted during this Drought Emergency include the following:

- Irrigation and watering of lawns is prohibited.
- Washing of cars is prohibited except for commercial businesses with recycled water.
- Fifteen (15%) to twenty percent (20%) reduction in household water usage.
- The serving of water at restaurants is prohibited unless requested by the customer.

Beginning late last year, DTMA requested voluntary reductions in water consumption from our customers. DTMA conserved water by delaying hydrant flushing, conducting a systemwide leak detection survey, and enacting other water supply management measures.

DTMA realizes the significance of these requirements and appreciates our customers' cooperation. While these actions on an individual basis may seem insignificant, collectively we can all help to protect our water supply.

See the DTMA website for useful tips on conserving water.

Thank You to Our Public Works Department for Keeping Doylestown Safe Through the Winter

This winter, Doylestown Township faced multiple snowstorms, and our Public Works Department worked tirelessly to ensure our roads remained safe and accessible. From early mornings to late nights, the team salted and plowed without pause to keep traffic flowing smoothly across the township. In addition to maintaining the roads, they also cleared our bike and hike trails and parks, prioritizing these alternative routes as conditions allowed. However, please note that clearing the roads always takes precedence.

We're deeply grateful for the dedication of our Public Works team, whose efforts were vital in keeping the township safe throughout the winter. Their hard work ensured we were always prepared, no matter what the weather threw at us. As spring approaches, we look forward to warmer weather and the opportunity to enjoy outdoor activities and park visits. We are excited for the sunshine and the beautiful days ahead. A heartfelt thank you to our Public Works Department for their unwavering commitment this winter. We appreciate their dedication in keeping our community safe and thriving as we transition into spring.

Doylestown Township Municipal Authority

Update on Drought Emergency

As our area continues to experience record setting drought conditions, the Doylestown Township Municipal Authority (DTMA) remains committed to protecting our water resources. DTMA routinely monitors groundwater levels at various well sites throughout the township and surrounding areas. This information has been organized here to illustrate the fluctuating groundwater levels at these well sites with an emphasis on the general decline of the water table. The graph below shows the various DTMA wells, with the black line indicating the overall trend.

2024 – 2025 Monitoring Well Level

This past January is on record as the **3rd driest January** in over 131 years. www.drought.gov

Until meteorological conditions shift toward cooler, wetter weather, and groundwater levels increase, **DTMA will remain under a Drought Emergency Declaration.** Please visit the DTMA on our website for more information.

Happy 30th Anniversary, Central Park!

For 30 years, Central Park has been a cherished cornerstone of Doylestown Township. What began in 1991 as 108 acres of open land and a vision for a community park has since expanded to 150 acres, growing into a vibrant hub for recreation, education, and connection.

Over the years, the park has become a center for the community, offering a variety of enriching activities for all to enjoy. The park is home to the iconic Kids Castle, the C&N Amphitheater, the Thompson Performing Arts Series, bike and hike trails, exercise equipment, an award-winning native plant garden, and much more! As the township's needs have evolved, so has the park. New amenities and features have been thoughtfully added, not only to enhance the park's offerings and accessibility, but also to recognize and honor individuals, organizations, and legacies that have shaped Central Park and Doylestown Township. These additions include the Dick John Athletic Fields, the Edgar Putman Environmental Education Area, the sensory trail, the mini library, the game grove, the disc golf course, and the Life Trail®, an adult functional fitness area. Pavilion spaces have been created to support programs and provide gathering spaces, with bathroom facilities available for the comfort and convenience of park visitors.

The changing infrastructure of Central Park has been a direct response to the growing needs of the community over the years, ensuring that the park remains a welcoming and engaging place for all.

Each of these features provides new opportunities for engagement and enjoyment while serving as a lasting tribute to those who have contributed to the park's growth and impact. The park's incredible transformation is a testament to the dedication of the Board of Supervisors, Boards and Commissions, Township staff, residents, and the broader community, whose vision and support continue to shape Central Park as a place for all to enjoy.

Join us as we take a look back at the evolution of Central Park over the years!
What's your memory of the park? Can you envision a moment that stands out to you?

A Place to Grow, Play and Create Memories

Since its humble beginnings, Central Park has transformed into a vibrant space offering something for everyone, no matter their age. The park's evolution goes beyond just the changing landscape; it's about the experiences and memories that have been created along the way. One beloved tradition, especially in the winter, is the excitement of sledding down the park's hill. While the snow may eventually melt, the memories of those fun-filled winter days stay with us, serving as a reminder that Central Park has always been a place where new experiences and cherished moments are made.

Central Park is the place where folks choose to honor or memorialize loved ones, with trees and benches available for dedication. These special tributes provide lasting connections to the park, ensuring that the memories of those who have shaped our community are celebrated for generations to come.

2018

A Walk-Through History: Honoring Central Park's Natural Legacy

One significant moment in Central Park's history occurred in 1991 when a tree was planted to mark the park's growing importance in the community. This tree was planted to represent the park's humble beginnings. To honor its legacy, we're on a mission to locate this original tree, capture it in a commemorative photo, and celebrate both the park's past and its continued growth.

Over the years, the Board of Supervisors, volunteers, and dedicated staff have worked tirelessly to preserve and enhance the park's natural beauty. Their efforts have revitalized the landscape, ensuring that future generations will continue to enjoy the same beauty and tranquility that make Central Park a cherished part of the community.

In 2018, the Township celebrated its Bicentennial by planting 100 new trees in the park. Each tree planted not only honors the park's history but also nurtures its future, ensuring that Central Park remains a vibrant and welcoming space for all.

To this day, new trees are regularly planted within Central Park as part of our ongoing commitment to maintaining a greener, more sustainable park for generations to come.

Celebrating 30 Years of Summer Concerts and Community at Central Park

For 30 years, families and friends have gathered at Central Park to enjoy live music, celebrate summer, and appreciate the park's beauty. The Summer Concert Series has become a cherished tradition, uniting the community year after year.

Today, Central Park continues to grow and evolve, now offering even more for visitors to enjoy. The park features the stunning C&N Amphitheater, home to the Thompson Performing Arts Series, a lineup of free performances running from June through August. Concerts take place every Wednesday at 7 PM, continuing through August (weather permitting), offering a fantastic sought-out destination to enjoy live music in the heart of the park.

PERFORMING
Arts
S E R I E S

While enjoying the concert, visitors can explore the Beer Garden, featuring local favorite Warwick Farm Brewing and sample delicious offerings from food vendors or hot dogs cooked by staff and volunteers each week. The concerts also provide a great chance to connect with our sponsors, local community organizations, and township staff and volunteers. It's an evening that brings everyone together for a truly memorable experience! Central Park has become more than just a place to enjoy live music; it's a vibrant gathering spot for the community to come together and enjoy all that the park has to offer.

1995

2024

Looking to the Future: Celebrating 30 Years and Beyond

As we celebrate 30 wonderful years of Central Park, we're excited to look ahead to its future. With enhanced indoor and outdoor offerings, we're committed to ensuring the park remains a welcoming and vibrant space for generations to come.

We are deeply grateful for the dedication of the Board of Supervisors, Boards and Commissions, township staff, and the support of our residents, all of whom have helped create so many cherished memories.

Here's to the next 30 years of making even more memories at Central Park!

Expanding Central Park's Offerings

New & Improved Sports Courts

Central Park has long been a hub for sports and recreation, offering tennis, basketball, and pickleball courts since 1995, with renovations in 2011. These courts have been the backdrop for countless games, matches, and shared memories among friends and neighbors.

Now, as part of the Community Recreation Center (CRC) and Park Improvement Project, we're excited to enhance and expand these beloved spaces! The project includes brand-new, state-of-the-art courts for pickleball, bocce, tennis, and basketball—both indoors and outdoors. These modern facilities will provide even more opportunities for recreation, programs, and friendly competition.

Whether you're a seasoned athlete or just getting started, these upgraded courts will offer a welcoming space for all, further cementing Central Park as a place where fun, fitness, and community come together.

1995

1995

2011

New & Improved Restrooms

Central Park currently offers restroom facilities connected to Pavilion 1, which will remain available for use. However, as part of the ongoing Community Recreation Center (CRC) and Park Improvement Project, we're excited to introduce the Comfort Cottage, which will feature permanent and accessible restrooms located near the Amphitheater and Kids Castle. These upgraded facilities will ensure that all visitors have convenient and accessible options while enjoying programs, events, and activities. With these improvements, we're making Central Park an even more comfortable and welcoming place for everyone to enjoy.

Image is concept only.

Dumping Yard Waste in Stormwater Basins and Open Space Areas is Harmful

Stormwater basins and open space areas play a crucial role in managing rainwater runoff, preventing flooding, and protecting our waterways from pollution. However, some residents have been using these spaces as dumping grounds for yard waste, creating serious problems for the community and the environment.

WHAT IS A STORMWATER BASIN AND WHY IS IT IMPORTANT?

Stormwater basins are designed to collect and manage rainwater, allowing it to slowly infiltrate into the ground or flow through a controlled outlet. These basins help prevent flooding, reduce erosion, and filter out pollutants before water reaches our streams and rivers. When they function properly, they support local ecosystems and maintain water quality.

THE PROBLEMS CAUSED BY DUMPING YARD WASTE

While it might seem harmless to dump leaves, grass clippings, or branches into stormwater basins and open spaces, this practice causes numerous issues, including:

- **Clogged drainage systems** – Piles of yard waste block water flow, leading to localized flooding and costly repairs.
- **Decomposing material** – Organic matter breaks down and releases excess nutrients into the water, which can contribute to harmful algae blooms in local waterways.
- **Disrupted vegetation and wildlife** – Dumping smothers native plants and creates conditions for invasive species to thrive, reducing biodiversity.
- **Increased maintenance costs** – The Township's Public Works Department must divert resources to remove the debris, which ultimately costs taxpayers' money.

USE THE YARD WASTE SITE INSTEAD!

Residents are encouraged to take their yard waste to our designated **Leaf & Yard Waste Recycling Site**, located at the New Britain Road entrance of Central Park. Yard waste is accepted on the 3rd Saturday of each month from 9 AM to 11 AM and every Tuesday from 9 AM to 2 PM. Please note, this service is available to Doylestown Township residents only (no contractors).

At the site, yard waste is properly processed into mulch and compost, providing an environmentally friendly alternative to letting organic material obstruct stormwater basins and open spaces. The site is located at the New Britain Rd entrance of Central Park. **GPS address: 337 New Britain Rd, Doylestown, PA 18901.**

THE COST OF CLEAN-UP

Removing yard waste from stormwater basins requires valuable time and resources from the Public Works staff. Labor, equipment, and disposal fees add up quickly, and these expenses are ultimately paid by taxpayers. By disposing of yard waste properly, residents can help reduce unnecessary costs and keep our stormwater management systems functioning efficiently.

WHAT STEPS ARE BEING TAKEN TO ADDRESS THE PROBLEM?

To combat illegal dumping, the Township will be implementing the following measures:

- **Installing signage to remind residents that dumping is prohibited**
- **Public education campaigns to inform residents of proper disposal methods**
- **Increased monitoring of known problem areas**
- **Potential fines or enforcement actions for repeat offenders**

**See the Impact
for Yourself!**

Let's work together to keep our community clean and our stormwater basins functioning as intended. Please do your part and dispose of yard waste properly!

Pennsylvania Urban Nutrient Management - Spring Greening

SPRING TO LIFE

As the snow slowly melts away, the birds begin to sing and fresh life bursts from the soil heralding the approach of spring and lawn maintenance season. For the one million-plus acres of home lawns in Pennsylvania, selecting and implementing an appropriate lawncare management program to promote healthy and aesthetically pleasing lawns is not only important to homeowners, but is also essential to protecting our waterways.

KNOW WHAT'S BEST. SOIL TEST!

The first step to understanding what your lawn really needs to be lush, healthy, and green is to know what your soil needs. It is important to conduct regular soil tests to determine nutrient deficiencies that should guide fertilizer selection and application. Soil test kits can be purchased for a nominal fee from your local Penn State Extension office. Following soil test recommendations, reading fertilizer label instructions, and using a properly calibrated spreader will ensure the right amount of nitrogen, phosphorus, and potassium are applied, while reducing nutrient loss and fertilizer cost.

SOIL HEALTH. IT'S THE BOTTOM LINE.

Maintaining a happy, healthy soil is imperative to your lawn's success. Soil is the foundation for your lawn and is home to a multitude of microorganisms that are essential for plant growth. Take the time to support your soil by incorporating some simple practices into your lawn care program. Your lawn and wallet will thank you.

- **Keep it open.** Routine soil aeration can help reduce soil compaction. Good soil structure is essential for proper root growth, healthy microbe communities, and the movement and exchange of water, air, and nutrients.
- **Raise it up.** Maintain a taller lawn by only cutting 1/3 of the grass blade with each mowing. Taller lawns slow runoff and promote deeper roots, which reduces lawn stress and improves soil structure.
- **Put it back.** Return nutrients and organic matter back to the soil by mulching your leaves and grass clippings.

For more soil management strategies, contact your local county conservation district or Penn State Extension office.

GREEN LAWNS – CLEAN STREAMS

Pennsylvania's 2022 Fertilizer Law amendments were developed to protect Pennsylvania waterways and the waterways downstream. As a bonus, following the limitations in the law will boost your bottom line by ensuring that your investment doesn't wash away. The 2022 law established the following nitrogen and phosphorus limits for turf fertilizer applications.

- Nitrogen is limited to 0.9 pounds of total nitrogen and 0.7 pounds of available nitrogen per 1000 sq. ft. per application.
- No phosphorus can be applied unless establishing or repairing turf.
- Nitrogen and phosphorus rates can be adjusted based on soil test recommendations and/or if using an enhanced-efficiency fertilizer.

In addition to the nutrient limitations, the law also established application parameters to prevent direct movement of fertilizer nutrients into our streams:

- Do not apply fertilizer if a heavy rain event is expected.
- Keep fertilizer away from drainage ditches, storm drains, or water.
 - » Maintain a 15-foot buffer from the banks of all waterways.
- Remove fertilizer that lands on impervious surfaces (driveways, sidewalks, roads, parking lots).

WORKING TOGETHER FOR CLEAN WATER

With ever growing acres of managed turf in Pennsylvania, controlling what goes into PA waterways is ALL of our responsibility. Help protect Pennsylvania's waterways by being wise when you fertilize!

For more information on the Pennsylvania Fertilizer Law, visit the Department of Agriculture's website at agriculture.pa.gov/fertilizer or contact Denise Uzupis at duzupis@pa.gov.
